

### May 2018:

In May, both daytime high and overnight low temperatures were above normal at Hillier. Overnight lows at Cherry Valley were below normal. Accordingly, accumulated base 10 °C growing degree days were above normal for May. Accumulated growing degree days were above 2017 and 2016 values across the appellation. Rainfall across Prince Edward County was on average 67 % of normal for May. Up to 28 mm of rain was recorded on May 15.
